

## SOLU-GLO™ WATER SOLUBLE WAX

*Wax Pattern after leaching process*

*Wax Pattern under ultraviolet light source*

- Less expensive, safer, simpler technique to detect residue left behind after leaching.
- Solu-Glo™ allows simple visual inspection with the use of black light or various other ultraviolet light sources.
- No special handling requirements:
  - Melt with agitation.
  - Inject and leach like any standard soluble wax.
- Solu-Glo™ is recommended for a wide array of parts.
- Solu-Glo™ is resistant to cracking and micro-fractures.
